QUESTIONS FOR THOUGHT AND DISCUSSION

1. Think about what it means for someone to be intelligent or able. What are the main criteria you would use to assess that question?
2. What role do you / might you have in promoting quality, inclusive communities for everyone?
3. What resources are available in your community to help people with disabilities understand options for inclusive education or employment?
4. What do you consider to be positive life outcomes for individuals with disabilities? Does your response include college? Career? Home ownership? Meaningful relationships, including the possibilities of marriage and children?
